Understanding risk

All forms of investment involve risk. The price and value of investments and any income that might accrue can fall, rise and fluctuate. You may not get back the amount of your original investment. Past performance is not a reliable guide to future returns. The effect of inflation may reduce the value of your investments. Changes in exchange rates or taxation may have a negative impact on the value, price or income of your investments. There are other risks that should be considered when investing including, but not restricted to: market risk, equity risk, liquidity risk, credit risk and counterparty risk.
